MODULE 4 Assignment

Name: N.Rachana

Creating season table

1. Open Power BI → Modeling tab → Click "New Table"
2. Paste the given DATATABLE code in the formula bar

```
Season =
DATATABLE(
  "MonthNumber", INTEGER,
  "MonthName", STRING,
  "Season", STRING,
  {
    {1, "January", "High"},
    {2, "February", "Shoulder"},
    {3, "March", "Shoulder"},
    {4, "April", "Low"},
    {5, "May", "High"},
    {6, "June", "Low"},
    {7, "July", "High"},
    {8, "August", "Shoulder"},
    {9, "September", "Low"},
    {10, "October", "Shoulder"},
    {11, "November", "Low"},
    {12, "December", "High"}
  }
)
```

3. Press Enter to create the table
4. Go to Data View to verify the Season table is created

Creating Monthly bookings

1. Open Power BI → Modeling tab → Click "New Table"
2. Paste the given DATATABLE code in the formula bar

```
MonthlyBookings =
SUMMARIZE (
    Booking_Details,
    Booking_Details[MonthStart],
    "TotalRoomsBooked", SUM(Booking_Details[Room Booked])
)
```

3. Press Enter to create the table
4. Go to Data View to verify the Monthly bookings table is created

Add New Columns in Bookings Table

1. Go to **Data View** in Power BI
2. Select the **Bookings table**
3. Click on **New Column**
4. Paste the formula → Press **Enter**
5. Repeat the same steps for each column below

Columns to Create CancellationFlag

```
CancellationFlag =
IF(Bookings[BookingStatus] = "Cancelled", "Yes", "No")
```

NoShowFlag

```
NoShowFlag =
IF(Bookings[BookingStatus] = "No-Show", 1, 0)
```

RefundAmount

```
RefundAmount = IF(
   Bookings[BookingStatus] = "Cancelled",
   Bookings[Revenue],
   0
)
```

RefundFlag

```
RefundFlag =
IF(Bookings[RefundAmount] > 0, 1, 0)
```

BookingDate

```
BookingDate =
VAR CheckInDate = Bookings[CheckInDate]
VAR PriorMonthDate = EOMONTH(CheckInDate, -1) + 1
VAR DaysBetween = DATEDIFF(PriorMonthDate, CheckInDate, DAY)
VAR RandomOffset = RANDBETWEEN(0, DaysBetween)
RETURN PriorMonthDate + RandomOffset
```

```
1 CancellationFlag =
2 IF(Bookings[BookingStatus] = "Cancelled", "Yes", "No")
```

Table: Bookings (20,000 rows) Column: CancellationFlag (2 distinct values)

Steps to Add Measures in Bookings Table

1. Go to **Report View or Data View**

2. In the Fields pane, select **Bookings table**
3. Click on **New Measure**
4. Paste one formula and press **Enter**
5. Repeat the same steps for each measure

Measures to Create

1. Bookings

```
Bookings =
COUNTROWS(Bookings)
```

2. CancellationRate

```
CancellationRate =
DIVIDE(
   COUNTROWS(
      FILTER(Bookings, Bookings[CancellationFlag] = "Yes")
   ),
   COUNTROWS(Bookings)
)
```

3. NoShowCount

```
NoShowCount =
CALCULATE(
   COUNTROWS(Bookings),
   Bookings[BookingStatus] = "No-Show"
)
```

4. Recommended Price

```
Recommended Price =
VAR BaseADR =
[DADR]
VAR SeasonAdj =
SWITCH(
SELECTEDVALUE('Date'[Season]), "High",
0.15,
"Shoulder", 0.05,
"Low", -0.10,
0
)
VAR Uplift = [Price Uplift % Value]
VAR Elasticity = [Occupancy Sensitivity Value]
```

RETURN
BaseADR * (1 + SeasonAdj + Uplift) * Elasticity

5. RefundCount

RefundCount =
CALCULATE(
  COUNTROWS(Bookings),
  Bookings[RefundAmount] > 0
)

Creating Visuals

Steps to Create Line Chart with Forecast Step

1: Insert Line Chart

1. Select Line Chart
2. Drag:
   - StayDate → X-axis
   - Occupancy % → Y-axis
3. Click dropdown on Occupancy → set to Average

Step 2: Fix X-Axis (Very Important)

1. Click on StayDate (X-axis)
2. Select:
   - StayDate (not Date hierarchy)

3. Go to Format → X-axis
    - Type → Continuous

Step 3: Basic Formatting

1. Go to Format
2. Turn ON:
    - Markers
    - Data labels (optional)
3. Add title:
    - *Average Occupancy by StayDate*

Step 4: Add Forecast

1. Select the line chart
2. Open Analytics pane (magnifying glass icon)
3. Find Forecast → Click Add

Step 5: Configure Forecast

Set:

- Forecast length → 3 or 6 Months
- Confidence interval → 95%
- Seasonality → Auto (or 12 for monthly data)
- Ignore last → 0

2. Cancellation Rate by MonthStart (Line Chart)

Steps:

1. Select **Line Chart**
2. Drag:
   - **Axis** → MonthStart
   - **Values** → CancellationRate (measure)
3. Format:
   - Turn ON markers
   - Title: *CancellationRate by MonthStart*

3. Count of BookingID by LeadTime (Bar Chart)

Steps:

1. Select **Clustered Bar Chart**
2. Drag:
   - **Y-axis** → LeadTime
   - **X-axis** → BookingID (Count)
3. Sort:
   - Click on visual → Sort by BookingID (Descending)
4. Title: *Count of BookingID by LeadTime*

4. RefundCount and NoShowCount by MonthStart (Stacked Column Chart)

Steps:

1. Select **Stacked Column Chart**
2. Drag:
   - **Axis** → MonthStart
   - **Values** → RefundCount, NoShowCount
3. Format:
   - Turn ON **Legend**
   - Title: *RefundCount and NoShowCount by MonthStart*

Final Dashboard
